

be on stone
panelized stone siding

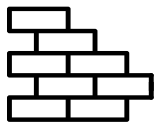

The background of the advertisement is a photograph of a rustic stone wall. A large, dark-framed window is set into the wall, reflecting a clear blue sky and green trees. The stone is grey and textured, with visible mortar joints. On the left side, there is a white vertical bar with a red stripe at the top.

PERFORMANCE BY DESIGN

Beonstone is the revolutionary way to achieve a stunning stone aesthetic in a fraction of the time and cost of real stone. From the timeless style of hand-cut stone to the clean, modern lines of stacked stone, Beonstone panelized stone siding offers a solution for any commercial or residential project with benefits that can't be emulated by any other system on the market.

UNMATCHED AESTHETICS

Available in four styles and 11 integral colors, there's a Beonstone perfect for any structure. Each collection contains 15 unique patterns to ensure the truly random look of natural stone, making it a perfect focal point or accent in both interior and exterior applications.

STREAMLINED INSTALLATION

Beonstone's patented mechanical anchoring system ensures perfect alignment and eliminates the need for mortar or grout. Featuring an intelligent Z-shaped panel, Beonstone doesn't require any special corner shapes or sizes, and allows for installation in any weather conditions.

BUILT-IN MOISTURE PROTECTION

The patented D.RAIN system provides peerless moisture protection. Integrated into each interlocking panel, the D.RAIN system channels water through and out of the wall and provides an air gap to completely eliminate water damage or mold growth. *See page 2 for more details.*

GET THE JOB DONE FASTER

Beonstone allows even a small crew to cover 25 sq. ft. per hour – up to 4x faster than other mechanically-attached veneer systems.

50-YEAR WARRANTY

Backed by a 50-year materials warranty and tested by IAPMO under the most challenging conditions, Beonstone delivers complete peace of mind for you and your customers.

INNOVATIVE TECHNOLOGY WITH UNEQUALLED PERFORMANCE. *THE PATENTED D.RAIN SYSTEM.*

The D.RAIN system built into the back of every panel automatically aligns, blocks and anchors the panel and provides for safe drainage in the event of water infiltration.

The panelized system allows for rapid installation in a fraction of the time of other attached masonry veneer systems – and without the need for specialized crews.

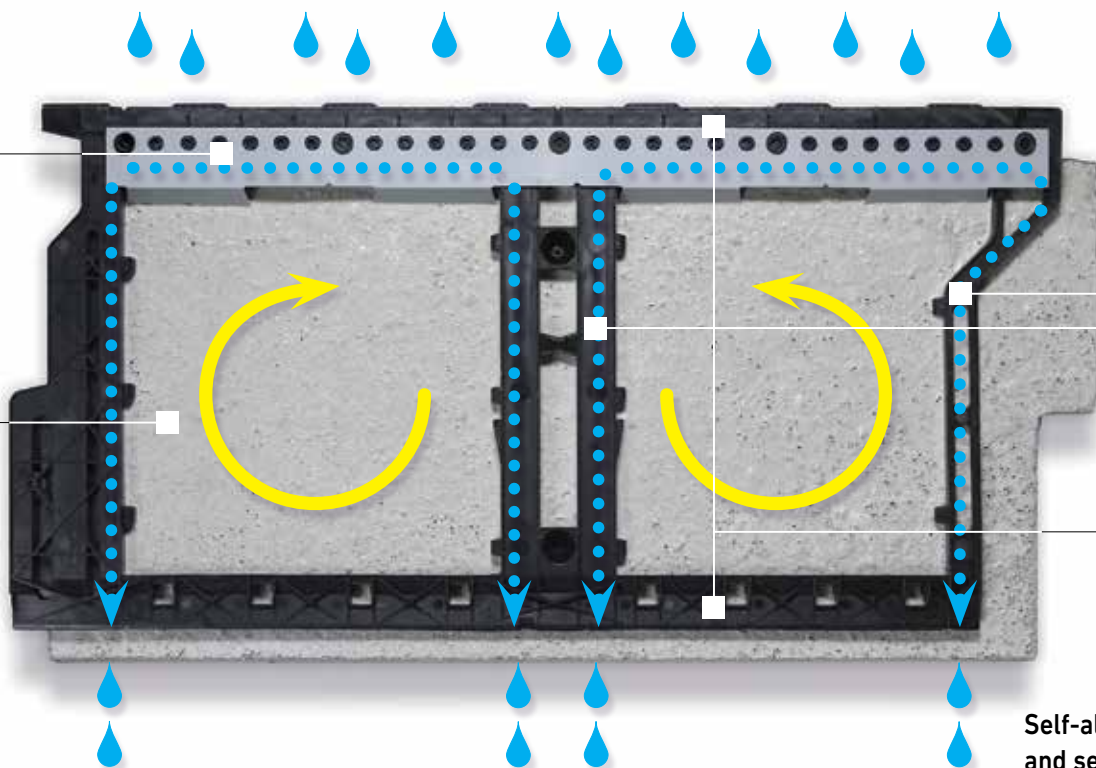

With self-aligning, interlocking panels that automatically establish a code-compliant air gap and continuous moisture management system, installing Beonstone is beyond simple – just start, clip and fasten.

Mechanical anchoring system

- Firmly fixed to structure by metal frame
- Maximum stability

Colored concrete

- Will not discolor
- Color remains intact even if the panel is damaged

Drainage and air flow

- Prevents excess humidity and mildew
- An air space allows the wall to ventilate
- Prevents water infiltration from contact with wall structure

Self-aligning and self-blocking system

- Easy to install
- Structurally strong

FIND A DEALER.

EXPERIENCE BEONSTONE FOR YOURSELF.

Our national network of Beonstone distributors are here to help bring your next project to life – whether it's a small-scale renovation or a commercial-grade build.

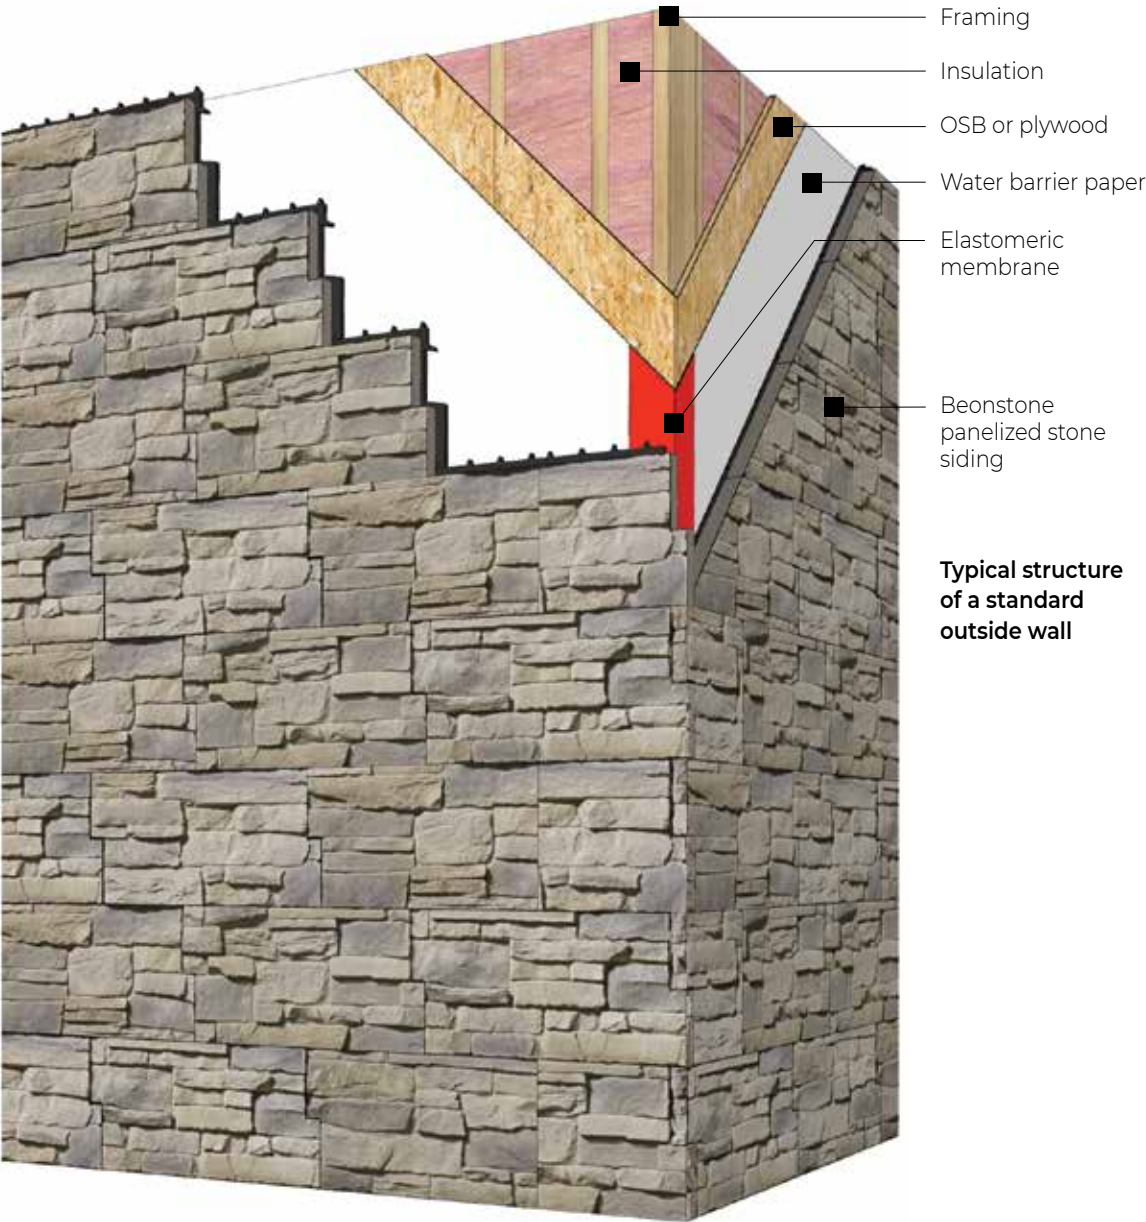

Visit Beonstone.com to order product samples, view specification documents, step-by-step installation guidelines, find your local Beonstone distributor and more.

UNPRECEDENTED EASE OF INSTALLATION.

UNPARALLELED PERFORMANCE.

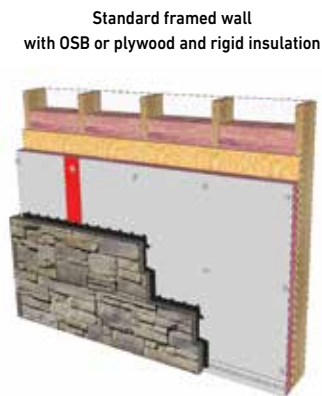

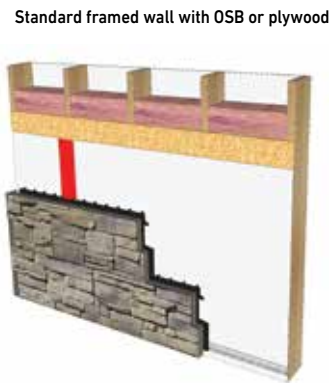

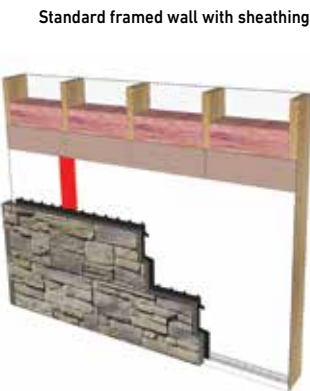

No mortar, no glue and no guesswork – just perfect installations in a fraction of the time.

Install up to eight times faster than natural stone over any substrate in just three easy steps.

IAPMO-APPROVED SYSTEM

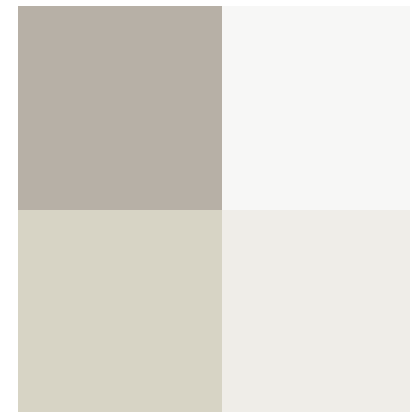

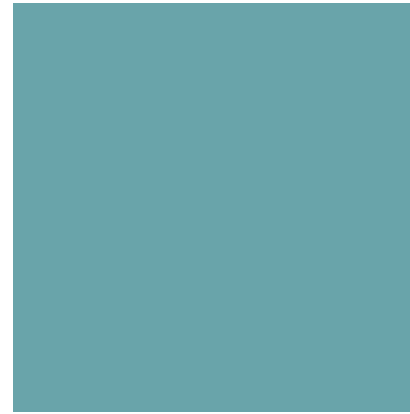

Beonstone panels are IAPMO-approved, including for use in Florida over any standard sheathing. The triple-screw system ensures that panels can be installed indoors or outdoors directly on a partition wall, concrete foundation, OSB or rigid insulation – no need to hit studs.

INSPIRED by nature ENHANCED by science

Beonstone's unique design combines the refined appearance of stone with the simple, highly efficient installation and performance benefits of mechanically attached siding.

Explore the Beonstone collection to find the aesthetic that matches your next commercial or residential construction or renovation project.
