THE CONTEMPORARY WAY TO THINK ABOUT STONE

50-YEAR WARRANTY

Be.On Stone panelized stone siding is remarkably durable. For this reason, the structural integrity of the concrete and the performance of Be.On Stone architectural panels are guaranteed for 50 years from the date of purchase when installed in accordance with applicable codes and procedures on a structure that meets local building codes.

ELEGANT

No other product has more style.

Give your home the distinctive beauty you have always dreamed of. All of our trendy European siding perfectly reproduces the look of natural stone and is synonymous with elegance and comfort. Available in four unique collections that blend perfectly with most current materials for a simply spectacular result!

EASY TO INSTALL

Nothing installs easier or better.

When it comes time to renovate, you will be amazed how easy it is to install Be.On Stone products. The stone siding panels are light and easy to handle. Just set them in place and screw them on. It's that simple! In just a few hours, the architectural style of a room or even your whole house will have a fresh new look!

PERFECT ADDED VALUE

Nothing offers greater value.

The distinctive and warm appeal of natural stone is available for a fraction of the cost! No one will be able to tell the difference—you alone will know that the secret is Be.On Stone panelized stone siding.

HIGH-PERFORMANCE

Be.On Stone, the ideal product!

Durable and versatile, Be.On Stone panelized stone siding products are designed for both interior and exterior applications, thanks to their integrated drainage system. No particular structure is required: the siding you choose can be installed directly onto a standard framed wall and works with any type of building.

THINKING OF RENOVATING OR BUILDING?
BE.ON STONE IS THE PERFECT CHOICE FOR ANY PROJECT.

ELEMENT COLLECTION

Inspired by the great cities of Europe, the Element Collection is a contemporary stone whose beautiful, pure lines blend structure and design.

Element Collection – OXO

COLOURS

Perfect harmony is the result when architectural features offer a balanced blend of various textures, forms and colours. The product colours in this brochure are as true as photography and printing will allow. We strongly suggest, however, that you base your final choice of product colour on an actual sample rather than on the images in the brochure. Some pictures are simulated.

BEFORE AFTER

« We were looking to reproduce a natural stone effect. However, we were aware of the difficulty of finding specialised labour to carry out work involving natural stone. By choosing a product like Be.On Stone, we ensured that our contractor could carry out the work without the need for sub-contractors, thus limiting potential delays. »

THE CHALLENGE

A POSITIVE
EXPERIENCE
WITH AN
OPTIMAL
RESULT!

THE RESULT

« An optimal experience with an aesthetic and functional product that in the end gave us exactly the result we were looking for. »

AN UNPRECEDENTED EASE OF INSTALLATION

No mortar, no glue, no mess.

The Be.On Stone panelized stone siding concept offers a truly unique design. A few simple tools are all you need to complete stylish and durable interior or exterior projects. With light, easy-to-use Be.On Stone panelized stone siding, installation has never been easier. Simply clip in place and fasten—that’s all it takes. **No mortar, no glue, no mess.**

Start

Clip

Fasten

Typical structure of a standard outside wall

There are no specific structural requirements. You can install the panels inside or outside directly on a partition wall or concrete foundation. If you wish, you can begin by installing compressed panels for better insulation.

Standard framed wall with sheathing

Standard framed wall with OSB or plywood

Standard framed wall with OSB or plywood and rigid insulation

Foundation

D.RAIN PATENTED SYSTEM

The D.RAIN system built into the back of every panel automatically aligns, blocks and anchors the panel and provides for safe drainage in the event of water infiltration.

1 Mechanical anchoring system

- Panels attach firmly
- Maximum stability

2 Coloured concrete

- Will not discolour
- Colour remains intact even if the panel is damaged

3 Drainage and air flow

- Prevents excess humidity and mildew
- An air space allows the wall to ventilate
- Prevents water infiltration from contact with wall structure

4 Self-aligning and self-blocking system

- Easy to install
- Structurally strong

You can download the technical guide and a complete set of drawings and cross sections for your project, which you can find by clicking on the **RESOURCES** link on our website.

For new construction or renovation, three options are available. The simplest is to rely directly on the window frame with a silicone joint. The addition of an aluminum trim (or jamb) is an option that adds an aesthetic touch to your home.

Straight finish with silicone seal

Finish with aluminum trim

Finish with window sill, trim and jamb
